DETAILED ACTION

This application is a 371 of PCT/JP00/07917.

Claims 1-11 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a metalloprotease, DNA encoding said metalloprotease, vector comprising said DNA, host cell comprising said DNA and a method of producing the metalloprotease.

Group II, claim(s) 8, drawn to an antibody against the metalloprotease of Group I.

Group III, claim(s) 9, drawn to a method for screening for inhibitors of the metalloprotease of Group I.

Group IV, claim(s) 10, drawn to a composition comprising an inhibitor.

Group V, claim(s) 11, drawn to DNA of SEQ ID NO:24-31.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Groups I, II and IV-V do not share a special technical feature because a protein, an antibody and inhibitor are different compounds, each with its own chemical structure

Art Unit: 1652

and function, and they have different utilities. The structure of an antibody of Invention III is not predictable from the structure of the protein of Invention II and an antibody can cross-react with various proteins. The DNA of Group V does not share a special technical feature with the DNA of Group I because the DNA of the two groups have different structure and utilities.

Under 37 CFR 1.475 (d), a national stage may not relate to multiple products or multiple processes in one application.

In addition to election one of the groups listed above, applicants are required to further elect ONE patentably distinct gene of SEQ ID NO:24-31. The DNA of SEQ ID NO:24-31 have different structure, physical and chemical properties, and utilities.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
